4Sight – THE BASICS

4Sight is your all-in-one platform for understanding and supporting your workforce.

We combine real-time wellbeing surveys with powerful reporting and tailored benefit recommendations, all guided by three AI-powered assistants: Archie (your smart survey architect), Alice (your insight whisperer), and Barney (your strategic analyst).

Whether you're tracking stress levels, assessing financial wellbeing, or checking in on team morale, 4Sight delivers instant insights to help you take meaningful action.

IN RECENT SURVEYS:

- Mental stress costs UK businesses an average of £500 per employee per year
- 46% of employees felt their employer didn't care about their health
- A third of employees have lost sleep worrying about their finances
- 45% of employees have considered leaving a job due to stress

Engaged employees are over 40% more productive.....In a typical business:

- A third of employees are actively engaged, which is good
- Half are disengaged, not so good...
- The remainder are actively disengaged, which is really not good

Wouldn't you like to be the employer that retains the best talent, without incurring absence related costs, and continues to get the best from their employees?

CORE MARKET JUSTIFICATION

Business executives are overloaded with generic statistical data focused on “employee wellbeing”, but the data is worthless unless you can:

1. Get personal, clinical data for your own business.
2. Provide employees with personalised and needs adjusted self help guides.
3. Give business executives the insights they need.
4. Offer impartial strategic advice with access to hundreds of benefits.

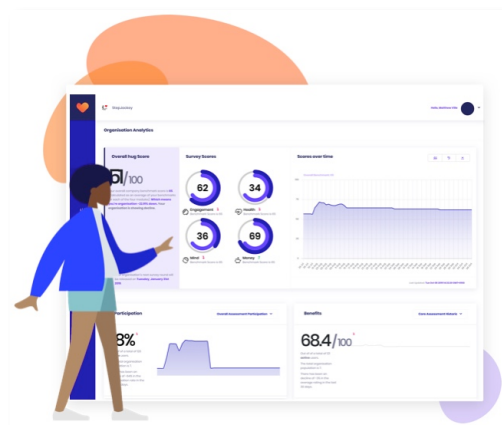

WHAT WILL 4Sight DELIVER?

4Sight will deliver three core services:

1. For the employee, 4Sight will produce automated surveys and prescribe employee guides and benefit links to improve their wellbeing and engagement.
2. For the employer, 4Sight will generate evidence based, meaningful and valued workplace MI along with impartial advice and communication strategies.
3. For the business, 4Sight will prescribe products and services for the organisation via an independent, transparent, fully reviewable employee benefits marketplace.

Clear real time dashboards help you keep track of responses and emerging trends.
